Construction Text

by Kenneth C. Loudon.

Preface. This book is an introduction to the field of compiler

construction. It

combines a detailed

study of the theory

underlying the modern

approach to compiler

design, together with

many practical

examples, and a

complete description,

with source code, of a

compiler for a small

language.

Construction

Compiler Construction, a modern text written by two leaders in the field, demonstrates how a compiler is built.

Describing the necessary tools and how to create and use them, the authors compose the task into modules, placing equal emphasis on the action and data aspects of compilation. Attribute grammars are used extensively ...
