Wikibooks is a collection of open-content textbooks, which anyone with expertise can edit – including you. Unlike Wikipedia articles, which are essentially lists of facts, Wikibooks is made up of linked chapters that aim to teach the reader about a certain subject.

Laptop Hard Drive Buying Guide

The first consideration when deciding to buy a data storage drive is whether you need a solid state drive (SSD). While SSDs serve the same general function as traditional hard disk drives (HDDs), they have a few pros and cons. An SSD is a type of data drive that uses flash memoryinstead of the spinning metal disks found in traditional HDDs.

Buying a New Hard Drive: 7 Things You Must Know

A traditional slower hard drive will appear in the specs as "HDD" while the newer, faster solid-state drives will appear as "SSD." If you don't need a lot of storage space, opting for the much...

Laptop buying guide: Here's what to look for in a new computer

Traditional hard disk drives offer larger storage capacities, but add to a laptop's weight and thickness while generating heat and noise. Alternatively, solid state drives (also known as SSDs or flash storage) are much lighter, faster, cooler and quieter than hard drives — but they're also much more expensive per GB, so typically provide less ...

Laptop Buying Guide: How To Buy A Laptop - Best Buy

Why? SSDs are like the flash memory in your smartphone or iPad — smaller, lighter and faster than a hard drive, with no moving parts. Hard drives spin. So solid state drives are less prone to damage and much easier on a battery. SSDs do have a downside: less storage, on average, than a hard disk. A laptop may have 256 gigabytes of SSD storage ...

Laptop Buying Guide - Features for Your New Computer
